WIWA DUOMIX 333 GX

WIWA DUOMIX 333 GX

64-240:1/84.6-803.7ccm

Powerful plural component Airless paint spraying system DUOMIX 300/333

DUOMIX - the worldwide proven WIWA plural component range for large area coating.

WIWA DUOMIX heavy-duty coating systems. The reliable system concept for the wide range of plural and triple component coating materials. WIWA DUOMIX - actually the only plural component system in the world that offers you the flexibility of a variably adjustable plural component system in combination with the reliability of a fixed mixing ratio and can also be used as triple component system. Used all over the world for the application of highly viscous, solvent free plural or triple component materials. When using materials with extremely short pot life (e.g. 30 seconds) the WIWA DUOMIX reveals its particular strength. A glance at the extensive, optionally available range of accessories shows that a vast variety of equipment variants for innovative fields of application is also available for this product range.

WIWA DUOMIX 333 GX is available in more than 420 configurations. Don't hesitate to contact us - we will find your perfect choice.

| | |
|----------------|------------------|
| Pressure ratio | 64 - 240 :1 |
| Max. output | 84.6 - 803.7 ccm |
| Mixing ratio | 0 - 12.7 :1 |

N - Normal steel galvanized, not stainless, R - stainless, RS - Stainless steel, rust and acid resistant.

B - On container, D - on tripod, F - on chassis, G - on rack, GZ - With feed funnel, W - on wall mount.

Application areas

- Marine and offshore industry
- Container construction
- Pipe and tank coatings
- Pipes and pipelines
- Railcar construction
- Large-capacity vehicles
- Building renovation
- Large surfaces

Material

- Wide performance range for virtually all low, medium and high viscosity coating and plural component coating materials
